EXPERIENCE

Internship -

Prifina

2022-11 - present

Working on an open-source project called Data Mine to create a public facing directory website for Prifina dynamic data to easily find all types of data objects and attributes available for developers to create all kinds data apps.

- Worked with a UX/UI designer to code the frontend of the project following Figma designs using Reactjs and Chakra ui.
- Connected the website to Prifina notion data-base through an express server and established the routing and a context to make calls to the API as needed
- Coded the sorting by search or by categories or by status logic from scratch.

Freelance -

Seocomponent.com

2022-9 - 2022-11

Working as a Frontend developer creating new pages and refactoring old code:

- Built new schema generators for various types of pages e.g.: Article, Event, Recipe , Job Posting ...
- Optimized the code by creating new reusable components and tools to make creation of new generators easier
- Established a new context to share states between components seamlessly

PROJECTS

Rest-Countries-Api

this is a challenge to create a website integrating the Rest Countries Api to show countries following a design and implementing search and pagination features,

Next.js, Typescript, TailwindCss, Context api
