SKILLS

- HTML5
- CSS 3
- JavaScript
- React
- Next.js
- Tailwind CSS
- Git

SOFT SKILLS

- webpack
- npm
- WordPress
- Shopify

PROJECTS

Ecommerce Product Page

This was a challenge from Frontend Mentor to build an e-commerce product page following the design provided. and to make it even better I used Next.js, this was a very good project to practice CSS3 and Context Api and getting familiar with Next.js

HTML5, CSS3, Next.js, Context Api

Live Demo : https://ecommerce-product-page-blue.vercel.app/

Portfolio Project

I created my own portfolio using the technologies I learned so far , it was built mainly with react and Tailwind css, and deployed using 'gh-pages', and it was to create a live static website from GitHub thus allowing me to push new versions to GitHub and simultaneously publish the updated versions

HTML5, TAILWIND CSS, REACT.JS, GH-PAGES

Live Demo : https://polymahh.github.io/othmane-elkantaoui/

Weather App

A Weather App fetching daily, hourly and multiple cities weather data from Open Weathermap API , the styling was done using tailwindcss and formating time and date was done using Luxon package for React.

HTML5, TAILWIND CSS, REACT.JS, REST Api, LUXON

Live Demo : https://polymahh.github.io/weather-app/

Movie Finder

This is a movie finder it fetchs data based on keywords from a movie library Api called OmdbApi and utilizes react-router-dom to automatically create pages with unique links and more details for every movie visited

HTML5, REACT.JS, REST Api, React-Router-Dom

Live Demo : https://polymahh.github.io/MovieFinder/
